Chen Yuk Lam 陳昱霖

倫敦帝國學院 (Imperial College London) 機械工程 (含四年本碩連讀)

Graduated student Chen Yuk Lam has enrolled in Imperial College London. He expresses gratitude to his alma mater for the foundational education that laid the groundwork for his pursuit of dreams. Here are some reflections from Chen on his journey of growth.

Being accepted into the Advanced Mechanical Engineering degree at Imperial College London, ranked among the top universities for engineering by QS World University Rankings, is a milestone that fills me with gratitude. I am equally honoured to have been offered a full scholarship by the University of Hong Kong to study engineering. These achievements remind me how important my primary school years were in laying the foundations for my learning. The knowledge, discipline, and confidence I developed in those early days gave me a strong start, helping me progress rapidly through secondary school and eventually reach where I am today.

Just as important was the spirit of hard work and dedication that I developed as a child. Primary school taught me the value of perseverance, a lesson that has stayed with me through every challenge I have faced. This attitude has become a steady driving force behind both my academic progress and my personal growth.

I am especially grateful for the warmth and encouragement from my school community. My teachers, particularly Mr Mak, my Primary Four class teacher, warmed my heart and soul when I was at the lowest point of my life. Experiences in the Cub Scouts, the debate team, and many other activities shaped my character by inspiring me to remain curious and determined.

As I continue my studies, I carry with me everything my school has given me. Many people have supported me along the way, and now it is my turn to work hard, give back to society, and contribute to the world. The school motto of HYTPS 文、行、忠、信 has stayed with me, and they continue to inspire the person I strive to become.
